

October 19, 2008

Dear Jodie,

I wanted to let you and your colleagues at Sunstar Butler know how wonderful the paste-free prophylaxis is, and how it has enhanced the already great line of dental hygiene products.

This product has helped me once again, to provide high quality care to my patients. Our family practice consists of clients ranging in age from 3-100. My young pediatric patients, no longer have to deal with tastes that are disagreeable, and that "sand" feeling in their mouth. Their smiles say it all! This product has also made it easier for the geriatric patient. It allows me to polish the heavy plaque and debris first without them wanting to rinse out numerous times before I scale their teeth.

It has been a win-win situation for all. Again, thank you for another great Sunstar Butler product.

Regards,

Gail Woller, RDH
East Windsor, NJ
